HEADQUARTERS FOURTEENTH AIR FORCE (AFSPC)

18 Sep 02

### MEMORANDUM FOR SEE DISTRIBUTION

FROM 14 AF/OV

747 Nebraska Avenue, SUITE B-109  
Vandenberg AFB, CA 93437

SUBJECT: Clarification on Dual System Clarification, OV 027-02 (30 OSS/OSOT Memorandum, dated 17 Sep 02)

1. Question: 30 OSS/OSOT requests clarification to determine training category and requirements for Air Force Launch Controller (AFLC) personnel designated to train for dual certification on launch systems (e.g., Titan and Atlas). In accordance with AFSPCI 36-2202, paragraph 3.3.2.7, Upgrade Training is accomplished through UQT "...to train an individual in another duty position within the unit (e.g., LC to LD, DMCCC to MCCC, SCO to CCH). In accordance with AFSPCI 36-2202, paragraph 3.3.3, Requalification Training (RQT) "...is given to qualify individuals who have been MR decertified, who have experience in a similar defense/weapon system, or following a major defense/weapon system modification." Do you concur that personnel trained as AFLC's in the Titan launch system, who are selected to become AFLC's in the Atlas launch system (or vice-versa), will receive "Upgrade Training" for the additional duty position IAW AFSPCI 36-2202, paragraph 3.3.2.7?

2. Response: Concur, these individuals would enter into Upgrade Training IAW AFSPCI 36-2202, paragraph 3.3.2.7. As used in this paragraph, "unit" is the squadron-level. For example, Upgrade Training would not be applicable for someone moving from the 2 SOPS to the 4 SOPS. Minor additional comment: AFLC is defined as Air Force Launch Crew Commander in AFSPCI 10-1202, attachment 2.

3. This response has been coordinated with AFSPC/DOTT. Please direct any questions to Major Trevillian at DSN 276-2766, e-mail: George.Trevillian@vandenberg.af.mil.

DANE HOLLENGA, Lt Col, USAF  
Chief, Standardization and Evaluation
